EXPERIENCE

Ayudakitdigital | Full Stack Developer
Feb 2024 - July 2024 [Barcelona, Spain]

Next.js store created by me: kilometrozero.org

- Developed numerous **Odoo** plugins for different clients, worked in both frontend and backend parts of every project. Also developed a **next.js** store frontend that connects to an Odoo backend for stocks and products of the stores of a town.

Hit Systems | Web Developer Intern
Jul 2023 - Dec 2023 [Barcelona, Spain]

- Collaborated in teams on the company's main application, utilizing **Git** and **GitHub** alongside other technologies. Developed multiple updates and bug fixes to improve the app's functionality.
- Additionally, built an AI-powered chatbot for food ordering via **WhatsApp Business API**, integrating communication with thermal printers. The project was developed from scratch using **JavaScript**

PROJECTS

Cheese
Feb 2024 - May 2024

- Developed Cheese, a "Tinder-like" App that recommends restaurants based on your likes and dislikes as a final grade project. Earned a 10/10 score for its functionality and implementation. Built the backend with **Express.js**, the web frontend with **React** and the mobile app with **React Native**.
